

Model 14R4 Under Construction

Model 14R4 Retail Concept

### Description

14-foot wind tunnels represent almost 50% of iFLY facilities around the globe. The Gen 7 -14R4 is the most common tunnel within the corporate fleet and one the industry has adapted great familiarity with. As new tunnels have been designed and innovated, wind tunnel purchasers have maintained an ongoing affection for the tried and true prototype that helped spread iFLY across the map.

### Options

Single or multi floor design options
